

Writing with Phonics K4 is designed for use as a kindergarten writing workbook. It is correlated with basic phonics sounds to help children learn phonics as they practice correct writing formation.

ABC-123 introduces number concepts and the writing of

numbers from 1 to 20. The children will enjoy counting the objects on the number sheets and coloring the pictures. The phonics pages provide guided activities in the following areas: short and long vowel sounds, simple consonant sounds, blending of consonants and vowels, and words containing one and two vowels.
